Why Communicate?

- Appropriate communication allows you to
  - Discuss business value and impact in a way that your audience will understand
  - Engage your audience and motivate to participate
  - Focus your message
  - Request what you want
  - Give others the words so they can help carry the message

Full-circle Communications

- Data governance communications takes a “full-circle” approach by ensuring **relevant communications** and interaction with **appropriate audiences**. Consider:
  - Up to management (direct reporting chain and their peers)
  - Down to those in the direct reporting chain and their peers
  - Out to colleagues
  - Within the internal data organization

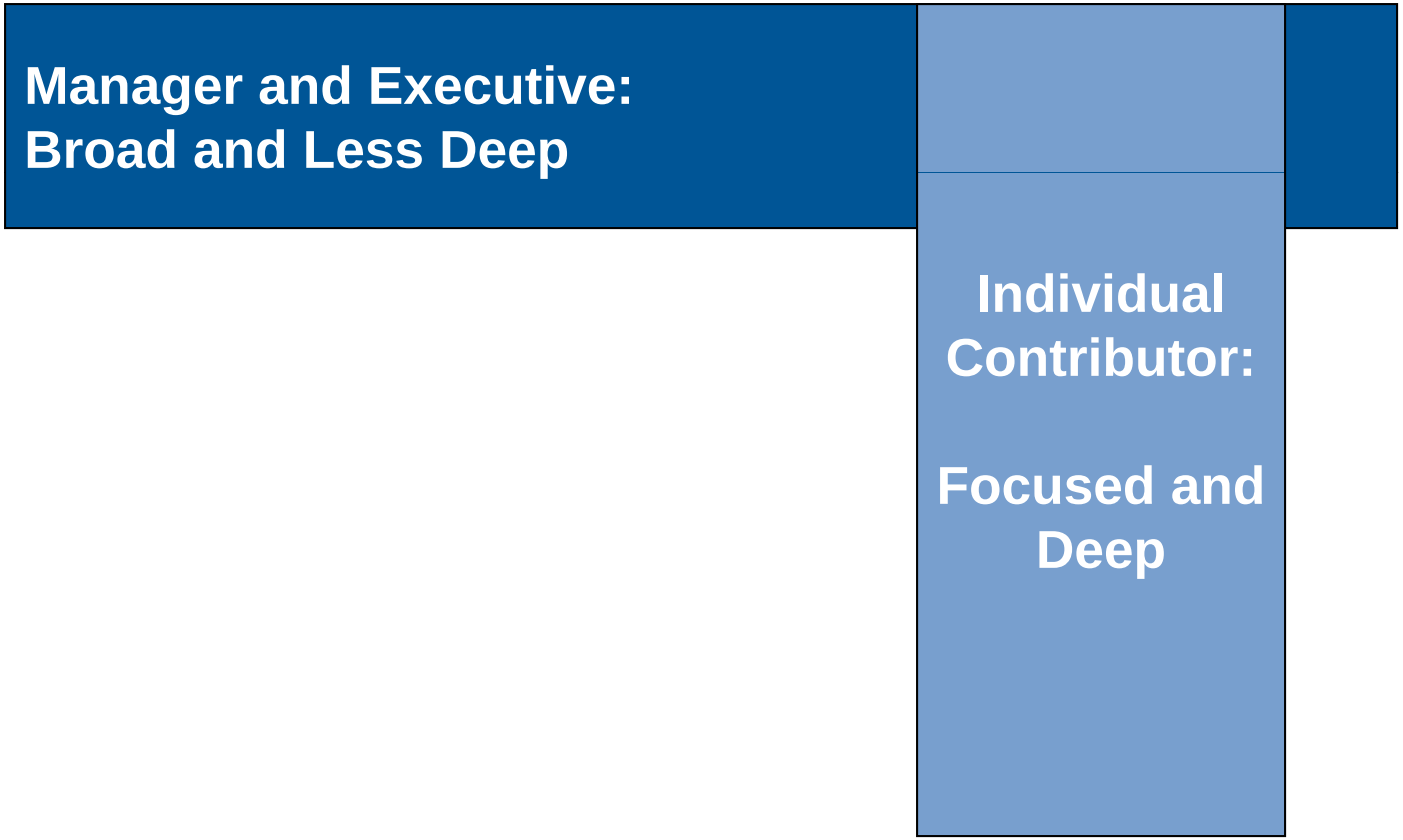

Full-circle Communications

Communication Differences

- How can understanding these differences help you communicate more effectively?

30-3-30-3 of Selling Data Quality

	30 Seconds	3 Minutes	30 Minutes	3 Hours
Purpose of the Session	Generate curiosity, e.g. “elevator speech”	Describe status, e.g. status report	Educate value, e.g. review session	Collaboration, e.g. Conference
Focus of the Session	Future oriented and focus on the positive	Current state status and value provided to the business and technology users	Issues, concerns, success stories	Whole picture, cover all aspects of data quality. Leave no stone unturned …
You want the audience to think what?	Your enthusiasm and passion for data quality	How much you have achieved with little or no funding	Data quality is valuable but not easy	e.g. Data quality is integrated into projects and operations
Message	Simple and high level; establish connections or relationships	Segmented into the layers; simple and straightforward	Points of integration, how data quality impacts the business	Detailed definitions, examples of value, stress the importance of growth
Audience Action Desired	Request for additional information regarding data quality and your initiative	Support for data quality	Understand the value as well as the utility of data quality	Agreement and consensus
Are you prepared???

Example: Communicate Business Impact

Did you know …

If the DEPT_WSF value is blank on a make part		You can't properly allocate costs back to the product lines?
The setting chosen to ensure that a warranty certificate shows up on a box content list		Can stop you from building the product?
The setting used to describe how a product is routed through the manufacturing process		Can cause the production plan to run for days?
If the address on the supplier master record is incorrect		Vendor invoices will not get paid?

They may not care about this

But they will care about this!

Communication Plan Template

Audience	Message and Desired Action	Trigger	Communication Vehicle	Development	Delivery	Other Action	Target Date	Complete Date

- Create your plan early in your initiative
- Use it, refer to it, and update it throughout
- Use as a reference tool to remind you to communicate throughout
- Capture results, feedback, and action items from your communications

Copyright © Danette McGilvray, Granite Falls Consulting, Inc. See www.gfalls.com

Communication Plan

- **Audience**: Who needs to hear? Who will be affected? Consider organizations, teams, individuals. Is there anyone specifically who should not receive the communication? Expect to have several audiences identified.
- **Message and Desired Action**: What you want the audience to learn, (what is changing, how the audience is impacted, etc.) and what action they need to take.
- **Trigger**: What initiates the communication, timing, event, etc. For example the first week in the quarter, a monthly management meeting, or when a phase of a project is completed.
- **Communication Vehicle**: Method of communication, e.g. in-person presentation, web meeting, email with files, posting on a website, newsletter article, via phone, etc.
- **Development**: Those who develop and create the communication. Those who provide content and input.
- **Delivery**: Those who present the communication. (This may be the same or different from those responsible for development.)
- **Other Action**: Action for preparing and completing communication.
- **Target Date**: Planned date for the communication.
- **Complete Date**: Date when the communication is completed.

Exercise: Communication Plan

Audience	Message and Desired Action	Trigger	Communication Vehicle	Development	Delivery	Other Action	Target Date	Complete Date

- Start with what you know. For example, you could begin by:
  - Listing the communication vehicles in your organization that you would like to make use of OR
  - Listing all the audiences OR
  - Listing specific messages and desired action
- Build your communication plan and modify the template to meet your needs

Summary: Build Your Business Case

Use results from assessing business impact to:

- Establish the business case for data/information quality and data governance
- Gain support for investing in these initiatives
- Determine the optimal level of investment

Build the business case by:

- Proper preparation and “connecting the dots” between business issues and the data
- Making use of the business impact techniques
- Using results to develop communications appropriate to your audiences
- Reviewing the exercises and pages with the action symbol

Basis for Today's Tutorial

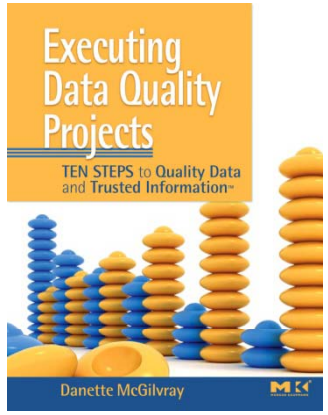

- The Ten Steps™ Methodology formed the basis for what you learned today
- These techniques apply equally well to data governance, data quality, or any data initiative
- The Ten Steps™ Process is designed to be flexible where you use only those steps applicable to your needs
- Today we focused on Steps 1, 2, 4, and 10 to build the business case
